

AL Serie

Technical data sheet

Metallic hot stamping foil

CHARACTERISTICS:

- The AL range is a medium release product with fine definition on a myriad of substrates including thermoplastic coatings such as OPP laminates and papers.
- The product is suitable for use on platen machines, such as Bobst BMA, Heidelberg GTP and Kluge and cylinder machines like Steuer PZ and Heidelberg SP.
- The product has a high temperature tolerance and is not prone to pre-heating.

APPLICATIONS INCLUDE:

- Aluminium wine caps Coated/uncoated and laminated paper stock.

TEMPERATURE:

- 100-120°C Platen machines
- 130-140°C Cylinder machines
