

KFDS Serie

Technical data sheet

Double sided metallic colored cold foil.

CHARACTERISTICS:

- Excellent board coverage, suitable for inside printing
- High operating speed and well suitable for the listed UV Adhesives
- Available in gold and silver

APPLICATIONS INCLUDE:

- Applicable on suitable modified reel-to-reel label presses on a wide range of substrate such as wide range of shrink sleeves material...PP, PE, PET
- Control UV lamp output and the tension of printed substrates to avoid shrinking during the printing process, Choose suitable UV ink and adhesive for shrinking application.
- Running speed: 30-60m/min
- UV lamp output: higher than 180 watts/cm(450watts/inch) The nip roller must be between 85 to 90 shore hardness.
